SITUATION SUMMARY

Governor Brown Declares State of Emergency for Northern California Wildfires

On 08/02/14, Governor Brown issued an emergency proclamation for the state of California due to the effects of wildfires in El Dorado, Amador, Butte, Humboldt, Lassen, Madera, Mariposa, Mendocino, Modoc, Shasta, and Siskiyou counties that have burned thousands of acres, destroyed homes and other structures and damaged critical infrastructure.

Cal OES Activations Due to Wildfires

- Cal OES Fire EOC is activated in support of statewide fires.
- The Inland REOC is activated at Level 2, Monday – Friday, 0800-1800 hours.
- The SOC is activated at Level 1

State Agency Activations Due to Wildfires

- The California Department of Public Health (CDPH) remains activated the Medical Health Coordination Center (MHCC) at Duty Officer status.

California Department of Social Services (CDSS)– Disaster Services Section

- There are currently no Community Care Licensing Facilities impacted. CDSS will continue to monitor the situation.

SITUATION SUMMARY

Inland Region

Inland Region is coordinating with Recovery staff and Counties of Modoc, Lassen, Shasta and Siskiyou to enter Initial Damage Estimate information into Cal EOC. Recovery Staff will arrive in Northern CA (Modoc) on Tuesday August 19 to begin working directly with local government and Inland Region Staff on IDE data. Tentative dates for FMAG briefings are August 27 & August 28.

- [Jim Morales, Cal OES Recovery, has returned from deployment to Modoc and Shasta Counties to validate IDEs \(Initial Damage Estimates\).](#)
- Robert Larsen, Cal OES Recovery, has been deployed to Mariposa County due to the El Portal Fire and is scheduled to return 8/23/14
- [Inland Region staff will be working with Madera County today \(7/21\) to enter IDE information into Cal EOC.](#)

SITUATION SUMMARY

City of Needles Severe Weather Incident, San Bernardino County (Updated)

Situation

On Tuesday, August 12, 2014 at approximately 1630 hours a severe thunderstorm settled over the City of Needles causing flooding and wind damage. The City of Needles reported a minimum of 50 downed power lines, damage to roofs, and multiple downed trees. A determination has yet to be made if this incident may be linked to the August Severe Weather Incident.

A Public Assistance Preliminary Damage Assessment is scheduled for tomorrow, 8/21/14

- The National Weather Service (NWS) and the Small Business Administration (SBA) determined that this is monsoonal flow but there were two separate storm systems and must be considered as two separate incidents beginning August 3 and August 12. A Preliminary Damage Assessment (PDA) for Public Assistance (PA) is occurring today in the Needles area with Cal OES PA, Southern Region and OA staff.

County Road Closures

- Goffs Road from I-40 west to SR-95, near Essex, closed due to flooding with no anticipated time for reopening. A detour is available.

Cal OES Deployments

- Sean Smith, Cal OES Recovery, is deployed to the city of Needles to assess damage and will return 8/22/14.

Hurricane-Tropical Storm, Hawaii, Pacific Ocean (Final)

EMAC Deployment

2014-SOC-4699 Deployment of A Team Type I Staff

- (2) OES staff and (1) CNG departed 8/8/2014, expected to return, 08/22/14.
- 1,000 (-100) residences remain without power.
- State and County EOC deactivated.
- California and Florida EMAC A Team members demobilizing on Friday

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

ACTIVE WEATHER WARNINGS, WATCHES and ADVISORIES:

- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA:

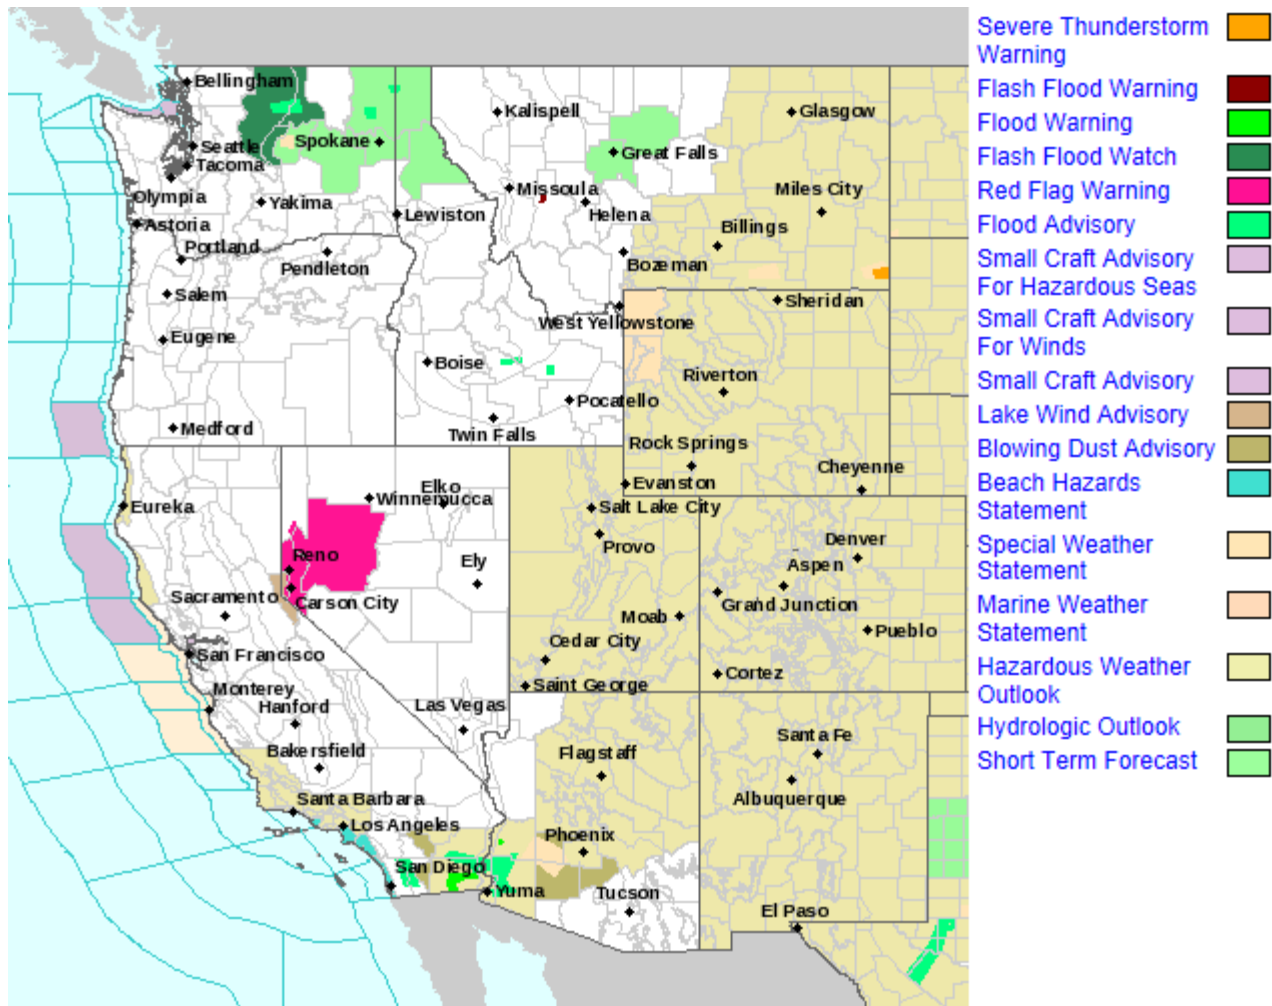

Moderate strength high pressure should bring seasonably warm and dry weather to Northern Operations today. On Friday, the southwestern portion of a cool trough digging southeast across the Pacific Northwest will bring several degrees of cooling, along with areas of partly cloudy skies in the east half. If the trough is strong enough to produce any showers, they will likely be just spotty and light, with best chances probably close to the Warner Mountains. Behind that Friday trough, Northern Operations will remain under a northwest flow aloft through Monday, with troughing lingering to the northeast near Idaho, and the strongest Pacific high pressure remaining well offshore. We will see light to moderate post-frontal north to east winds Friday night into Saturday, with light northeast winds remaining the prevailing low-level morning direction through about late next Tuesday. The Pacific upper ridge shifts eastward to be more directly over Northern Operations Tuesday - Thursday, for further warming and drying. Hotter inland valleys will see 96-103 maximum temperatures then, with generally poor overnight relative humidity recovery mid slope and higher.

SOUTHERN CALIFORNIA:

The upper level low which brought abundant thunderstorms activity to portions of the area has drifted further southeast and will track through northern Baja this afternoon. This will result in another round of scattered wet thunderstorms over the southern part of the state. Unlike yesterday, the storms died off overnight, but by the late morning into the early afternoon hours, thunderstorms are expected to develop near the higher terrain and the deserts of Southern California. The storms may be most numerous today over the Cleveland and southern San Bernardino National Forest eastward into the Mojave Desert. Scattered storms may also occur on the eastern side of the Angeles National Forest and portions of the Inland Empire. Further north, one or two storms may occur along the Sierra Crest. Temperatures will continue to be a couple of degrees below seasonal averages with highs in the lower 90s in the San Joaquin Valley, upper 80s in the valleys of Southern California, to the 70s in the mountains. The low will be out of the area tonight, which will lead to a quiet weather pattern over the weekend into early next week. Another trough may drop into Northern California over the weekend which may keep widespread marine layer stratus forming each night with slightly below normal temperatures going through Sunday. But next week, a ridge of high pressure is expected to expand into the region, leading to a warming trend. Temperatures may be above normal by next Wednesday. Onshore flow may produce winds of 15-30 mph in and near the deserts Friday and Saturday afternoon. Minimum relative humidity will likely drop into the teens by Saturday over most areas above 2,000 feet, away from the coast. Again, no further thunderstorm activity is expected after today through the period.

CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 20th : Don Pedro 42%; Exchequer 17%; Folsom Lake 40%; Lake Oroville 32%; Millerton Lake 47%; New Melones 24%; Pine Flat 12%; San Luis 20%; Lake Shasta 32%; Trinity Lake 31%; Pyramid Lake 94%; and Castaic Lake 44%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)
Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water¹ to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

Situational Summary

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.
http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/emergency_regulations_waterconservation.shtml
- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
